

The Construction Business is Growing!

BGBG partners with Boulder County and the City of Boulder to offer Ongoing Professional Development Training Opportunities To Ensure You are Prepared To Meet the Demand

In an effort to assist professionals interested in maintaining an edge in the green building industry, the Boulder Green Building Guild (BGBG), in partnership with Boulder County and the City of Boulder, has developed a series of in-depth professional trainings. These trainings are a must for anyone working in the local building industry.

The overall green building market is likely to more than double from today’s \$36-49 billion to \$96-140 billion by 2013.

McGraw Hill Construction (2009). Green Outlook 2009: Trends Driving Change.

How do you prepare to tap into this growing market?

The construction industry of tomorrow is not the industry of yesterday...or even today.

Are you are ready to position yourself and your business for the future?!

Plan to attend is a two-day Workshop lead by David Johnston, president of What’s Working, Inc., and offered through the BGBG: “**Green Building Practices and Certification**”; February 19th & 26th

World-renowned Deep-Energy expert, speaker and trainer, David Johnston, has educated thousands of residential building professionals over the last 30 years. Known nationally for his thorough and easy style, Johnston takes his experience as an award-winning contractor and his passion to transform the overall approach to the industry, and shares it in a manner that will empower you to apply your newfound knowledge on Monday morning.

As a participant, you will learn how to view the home from a green building mindset. This holistic approach will allow you to examine the home as an interrelated system and discover how all aspects of a home must function together in order to achieve a true green standard. This workshop has been designed to appeal to a variety of different audiences such as homeowners, realtors and contractors. Some of the topics covered will include; indoor air quality, water conservation and resource management. It will also cover best building practices for foundations, wall systems and roofing. Added benefits when you complete this workshop:

- **Green Advantage Certification** –This is the only nationally recognized certification. It has become the standard qualifier when looking for or bidding on a ‘green’ job.
- **Continuing Education Credits** - All trainings are eligible for State CE Credits and Self-Report Credit

Go to www.bgbg.org to Register, **Enroll Now! Seats are Limited!!**
