

**City of Longmont Census Information
Marital Status**

The data on marital status were derived from answers to the long-form question asking "What is this person's marital status," which was asked of a sample of the population. The marital status classification refers to the status at the time of enumeration. Data on marital status are tabulated only for the population 15 years old and over.

Each person was asked whether they were "Now married," "Widowed," "Divorced," "Separated," or "Never married." Couples who live together (for example, people in common-law marriages) were able to report the marital status they considered to be the most appropriate.

This map is based on information from the 2000 Census Summary File 3 and produced by the City of Longmont Neighborhood Resources Division and Planning Department.
