

Traffic Mitigation Device Sample Photos

Device #1: Median Island

Dimensions: To be determined

Purpose: Forces a sharper and therefore slower turn into the neighborhood and should discourage fast sweeping turns onto Wedgwood Avenue from Harvard Street

Device #2, 3, & 4: Speed Tables

Dimensions: 22' Wide, 3" Tall, 6' Ramps, 10' Flat Top

Purpose: Causes the vehicle to deflect vertically. The faster one drives over the device, the more uncomfortable the ride becomes inside the vehicle.

Device #5: Refuge Island

Dimensions: To be determined

Purpose: Forces a sharper and therefore slower turn into the neighborhood and will discourage fast sweeping turns onto Wedgwood Avenue from Hover Street. The device will also aid pedestrians and individuals with disabilities in crossing the street by providing a physical refuge in the middle of the street.
