Solid Waste & Recycling

Proper disposal and recycling or reuse of materials protects and enhances the environment

Solid Waste

The City of Longmont provides weekly trash disposal services to all single-family and many multi-family homes. Residential customers may choose between two levels of collection service; the full 96 gallon container or the smaller 48 gallon volume buster container.

- The volume buster level of service helps encourage waste reduction and conservation of natural resources

To help keep Longmont clean and beautiful, the City provides a Large Item Collection Program and the Rent–A–Dumpster Program for large items or debris.

Recycling Programs

The City provides extensive recycling services, including:

- Curbside single-stream recycling to single-family and multi-family customers
- 24/7 drop off or curbside recycling of used motor or transmission oil and auto batteries
- Drop off or cubside collection of tree limbs/ branches, bushes, and leaves for mulching

Recycling program information is available at
