Compliance Tips 2012

A number of industries had changes to staff in 2011. In some cases, this resulted in violations as new employees did not know about the permit, sampling and reporting requirements. Please contact the City as soon as you are aware of changes that could affect compliance.

Outside Storage and Storm Water Violations-

Outside storage is allowed as long as it doesn't result in a Code violation.

Open containers are considered a potential discharge violation.

Spillage around the container, leaks or tipped containers are illegal discharges.

Recommendations: cover/lids, spill containment, consider inside storage.

2012—LOOKING FORWARD

Item 1- **Annual fee** billing will be sent in January.

Item 2- New **surcharge** fee schedule effective January:

<u>Pollutant</u>	<u>2012</u>	<u>2013</u>
BOD per pound	\$0.41	\$0.43
TSS per pound	\$0.33	\$0.35
TKN per pound	\$0.23	\$0.25

Item 3- The WWTP received a new NPDES permit in 2011. Industrial Pretreatment is required to re-evaluate the local limits during 2012. Permit amendments are anticipated for metal parameters.

Item 4- EPA categorical pretreatment standards for dental offices are expected in late winter.

Item 5- CDPHE is implementing a new grease hauler program that will affect cooking oil recyclers and grease trap pumpers.

Item 6—EPA regulations on pharmaceutical disposal for hospitals and pharmacies are expected.

GOODBYE BUTTERBALL

The turkey plant was built in 1951 and in 1984 it was one of the first industries in Longmont to obtain a discharge permit as a significant industrial user. The maximum one day sewer discharge was 1,916,414 gallons in 1996. Butterball purchased the plant in 2006 and it was closed at end of 2011.
