

SeniorNet

SeniorNet in Longmont...a computer learning opportunity for those 50+.

The Longmont Learning Center for older adults was established in 2000 through a partnership between SeniorNet, Front Range Community College (FRCC) and Longmont Senior Services.

There is a yearly membership fee of \$20.00 per individual. Class registration begins August 16 at the Senior Center. Coaches will be available to assist with class selection on Monday, August 16, from 8:00 a.m. until 5:00 p.m. and on Friday, August 20, from 2:00 p.m. - 4:00 p.m. Classes are held at Front Range Community College. Contact the Senior Center at 303-651-8411 if you have any questions.

.....

CLASS DESCRIPTIONS

Introduction to Computers I

This 4-session course is designed for students with no computer experience. You will practice extensively using the mouse and the keyboard and gain familiarity with computer hardware, software, and the Windows program.

Digital Camera and Photo Basics

In this 2-session course, we will explain the very basics of how to operate your camera, including loading photos onto your computer, attaching photos to email, and simple photo editing.

Introduction to Computers II

This 6-session course is for students who have basic computer experience. Familiarity with using the mouse and the keyboard are required. You will learn how to enter and edit text using Microsoft Word, how to add graphics, how to save and manage your data files, how to send and receive email, and how to access and search the Internet. Prerequisite: completion of the Introduction to Computers I course or pre-approval by the instructor.

Microsoft Word 2007

This 2-session course will show you the difference between Microsoft Word 2003 and 2007. It will show you how to find the editing tools in the new Word ribbon format. Prerequisite: experience with Word 2003.

Graphics Project

This 2-session course is designed to teach the concepts for creating Greeting Cards and other computer generated projects. Students will use graphics software to create a small monthly calendar. Have fun learning and sharing ideas. Prerequisite: completion of the Introduction to Computers II course or pre-approval by the instructor.

Windows 7 Lecture

This 2-session course focuses on many of the changes implemented in Windows 7 and covers some of the revised operation, different look and enhancements in Windows 7 compared to the previous Microsoft Vista and Microsoft XP operating systems. Prerequisite: completion of the Introduction to Computers II course or pre-approval by the instructor.

PhotoShop Elements

This 6-session course is for those who want to work with Adobe PhotoShop Elements to enhance your photographs and digital images. You will learn to improve colors and exposure, to remove unwanted elements from a photo, and to move images from one picture to another. Learn to create collages, add borders and frames. Prerequisite: completion of the Introduction to Computers II course or pre-approval by the instructor.

Genealogy Basics

The Legacy Family Tree program is an easy and complete resource for building and sharing your family tree. Learn how to use it to record your family's history. This 4-session course will teach you the basics: how to enter your family information, document it, create and customize charts. Prerequisite: completion of the Introduction to Computers II course or pre-approval by the instructor.

Introduction to Computers III

This 4-session course is designed for students who have been using the computer for awhile and are familiar with text processing, the internet, and email. Learn how to organize your files into folders; add borders and photos to documents; burn files to a CD. Expand your knowledge of exploring the internet and using your email. Prerequisite: completion of the Introduction to Computers II course or pre-approval by the instructor.
